Interviewing tips to impress:

1. Ask great questions. Do your research about *their* values; use terminology from their site and from people you know who associate there.
2. Be flexible. Make sure your interviewers know that you care about the results that work best for everyone. Always have their goals in mind.
3. Show your excitement about the position. Make sure your interviewers know why you want the job while matching your professional experiences and successes to their needs. Show them that you meet their needs in every way.
